Work Experience

AMD **San Jose, CA**
Software Engineer Intern, Internal Development Tooling June 2023 - September 2023

- Accelerated Vivado constraint processing by 50% with a new C++ pattern matching function.
- Developed unit tests achieving 100% coverage to ensure performance and accuracy for Wildcard Matching.
- Reduced Vivado memory usage by 2% by refactoring code to utilize Tessil C++ Hash map package.
- Automated memory, encryption tests, and key upgrades using Python, cutting testing time by 50%.

Shellie.us **San Francisco, CA**
Full Stack Software Engineer Intern, MERN Stack June 2022 - September 2022

- Developed a React-based hierarchical UI with dynamic modals and edit functionality for exhibits.
- Created REST API integrations for editing and saving exhibit data in the NoSQL backend database.
- Created reusable React components, improving maintainability and reducing development time by 30%.
- Used React and Redux for state management, enhancing data consistency and reducing errors by 20%.

Projects

AI Model Demonstration Wesbite | *Flask, AWS, GCP, LLM, REST API*

- Configured and deployed 3 AWS EC2 Linux VMs for AI model performance testing and benchmarking.
- Deployed an end-to-end Flask web app with Nginx to showcase OpenAI-like LLM inference via HTTP.
- Developed a Flask API server capable of handling hundreds of image generation requests.

Historical Stock Information Visualization Website | *Flask, Javascript, SQLite, CSS, Git, CI/CD, GitHub Actions, REST API*

- Developed a platform for users to search and visualize four years of stock financial data.
- Designed a custom Trie structure indexing over 5000 stocks by market cap for efficient search results.
- Improved stock information retrieval API time by 90% through optimized workflows.
- Enhanced initial front-end load by prerendering charts, reducing subsequent render times by 40%.

Website for Daily Commute Information | *React, Javascript, CSS, Bootstrap, Google Auth, GCP, Firebase, Git*

- Designed and developed a user-friendly commute planning website, providing 100% current traffic info.
- Configured Firebase for secure user authentication and data storage, optimized for thousands of users.
- Utilized Google Cloud Functions for server-less computing, sending emails with optimal routes daily.

Collaborative Full Stack Website | *Java, Javascript, SQL, Maven, Jest, Git, CI/CD, Jenkins, RESTful API*

- Collaborated in an Agile team to deploy seven front-end and back-end features in a legacy codebase.
- Reduced search query volume by 60% by implementing instructor search filters in the database.
- Implemented local storage for user form metadata, reducing course search time by 30%.

Education

University of California Santa Barbara **Santa Barbara, CA**
Bachelor of Science in Computer Engineering September 2020 - June 2024

3.7 GPA, Dean's Honors, Relevant Coursework:
Data Structures, Algorithms, Operating Systems, AI, Machine Learning, Full Stack Web Development, UI/UX Design

Technical Skills

Programming Languages: C++, Java, Python, C, PostgreSQL, SQL, SQLite, JavaScript, HTML, CSS, JSON, YAML
Frameworks: React, Node.js, Flask, Bootstrap, Material-UI, Storybook, Spring Boot
Developer Tools: Git, Docker, Jira, Google Cloud Platform, Confluence, Perforce, NPM, Firebase, GitHub Actions, MongoDB, Jenkins, Kubernetes
Libraries: pandas, NumPy, TensorFlow, PyTorch, Keras, Seaborn, matplotlib
